chynapblair@gmail.com | 423-310-5096 | chynablair.com

SKILLS

Proficient: JavaScript, HTML, CSS, React, Bootstrap, Node.js, Express.js, Git, GitHub

Experienced: React Native, MongoDB, Google Firebase, Postman, jQuery, SCSS

PROJECTS

CineFiles

React, Axios, Google Firebase

- Interactive movie application that allows users to create an account, browse and search movies, save to their favorites, and create a movie watchlist.
- Utilizes Axios for requests to The Movie Database API. React Context API and Google Firebase used for authentication.
- Code: <https://github.com/chynapb/cinefiles>

NBA Stats

JavaScript, Express.js

- This application allows users to search season statistics of any current or past NBA player.
- Backend built with Express.js. JavaScript Fetch API used to retrieve data from the BallDontLie API.
- Code: <https://github.com/chynapb/nba-stats>

SneakerHeadz

React, Express.js, Stripe

- E-commerce sneaker store built in React. This site allows users to browse sneakers, add items to their cart, and complete the checkout process.
- Backend built with Express.js for Stripe payment processing.
- Code: <https://github.com/chynapb/sneakerheadz>

My Weather

React, Axios

- Weather application that allows users to search the current conditions and 5-day forecast for any city in the world.
- Built with React and utilizes Axios for requests to the WeatherAPI.
- Code: <https://github.com/chynapb/my-weather>
